If the Tuners of the 3d last., Public a communication relative to a Protective Tariff, is which the writer expresses the opinion that the Democratic party derived its success from the Year Trade policy. Without wassing the space h. your valuable paper to discuss that point, it is nearly suggressed that it would be easy to democstrate this fact that for many years past the Degocratic party has derived its pout at Forni the many and the political influence of Southern as owholdest. In fact, it may well be doubted whether the Democratic party would ever have assumed the face trade splicy at all, were it would not the state of the southern chivalry, let be inquire candidly, what is the object of a polective fasil? Is it not to profect our home sanufacturers from forcign competition? But why protect from competition is the great regulator of trade and manufactures both? And why protect the mechanic said as protect the farmer also I has wer: The farmer does not need such protection, became England can manufacture goods much cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them when the cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them the cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them the cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them the cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them the cheaper than we can.

But, say the objector, ought we hof to purchase goods wherever we can get them the cheapest? We think not in this case. First, became to hay our goods from England sound tend to bring down the price of labor in our own country to a level with that of England. Second, it would tend to oppress the poor, and to increase the power of any other nation. For allustration, the many the bevelop these unioid resources. But the real prosperity and Appoisses of the people will lepend upon the resister condition of the la-coring classes. If they are allowed the ad-rentages of education, and of gaining wealth, at they have been in the Northern States, we half enjoy a degree of prosperity unparalled of the history of nations.

Under a protective tariff the price for la-or has always been known or three times. men, under Marion—have for several days upon Carri-miles back of Brandenburg, arion, with a spece of some

without fall, and they come amply provided with all sorts of means and appliances to enjoy the sight—that is, with every thing but the needful magnesium wire, and one walsteoat peckettul of what would be worth a whole donker-lead of that they do bring up to enable their souls to realize the ancion glories of the internal scene.

I remain yours very truly,

John Spiller, Esq., Chemical Department, Royal Arsenal, Wouldwish.

Resources of Canada.

The Hamilton (Canada West) Speciator gives the following estimate of the resources of Canada. The Hamilton (Canada West) Speciator gives the following-estimate of the resources of Canada:

First, the mineral wealth of Canada is immense, needing only capital to develop it and render it a great source of national wealth. The Lake Superior copper has already become famous for the extend and value, and the Action Copper Mines, in Lower Canada, as one of the richest in the world. The fron deposits in the neighborhood of Lake Superior seems to be practically inexhausible.

In the vicinity of the Gilbert and Chandlers rivers, in Lower Canada, have been found large deposits of gold, which seems sitely to conduce largely to the wealth and prespectly of the provinces.

With the oil well of Upper Canada we are all more familiar, but probably few among us have any adequate tide of their importance. The section of country embaned by Canada smuntly seems almost fabulous. Of wheat last year over 25,000,000 bankels was grown 12 00,000 bushels of pass, 46,003,000 bushels of oats; ever 1,500,000 to bankels was grown 12 00,000 bushels of polatoes, and 10,000 000 bushels of turnips. We also produced 39,000,000 bushels of polatoes, and 10,000 000 bushels of turnips. We also produced 39,000,000 bushels of neater of buck-wheat; 28,000,000 bushels of polatoes, and 10,000 000 bushels of turnips. We also produced 39,000,000 pounds of butter. The number of mitch cows, horses, sheep and pags is considerably over two millions.

Turning to our manufaccies we find them by no meany insignificant. Lower Canada alone contains ever 2,000 miles of railroad traversing the country in all directions.

The population of Canada liable to fulliar, duty, is about a half a million, the embadied militha 90,000 men, the volunteers alone numbering some 50,000.

A Bermintscence of Gon. Falmer.

(From the Papich (Ky.) Federal Union.]

(Gen. John M. Falmer, recently appointed to command the military District of Kenneky, was delegate to the immon national convention which assembled in Paliadephir to the Control of the Con

or oruy, and londly, and mover only, our and only, and mover only, ours.

M. Janonam Claure.

To Much Eack for his Brain—The Augusta Chronicle and Smitnel says that when Bragg was in that city a little incident occurred which shows that Gen. R. is not the 'dry old stick' he has the credit of being President Davis had telegraphed to General Bragg, in the usual way, to hold the State at all hazards, stop up the roads, desiroy supplies and crists Shorman. At the close of the dispatch, the strange phenomeson of an ince seemed to strike him, and he saked: "What is your available force for this purpose?" To which Gen. Bragg promptly replied: "Five proclamations and one brigade." Our informant did not see the the point, and saked Gien. Bragg to explain. "Why!' said he, "Gov. Brown issued a proclamation, that was one. Gen. A. R. Wight's made two. The Fresident's made shree. Senstor B. H. Hill's made four, and that from the right members of Congress hade five. I shall consider Shorman a hard case if I can't 'crash him with five proclamations and one brigade."

FINANCIAL AND COMMERCIAL. FINANCIAL AND COMMERCIAL. MONETARY. MONETARY,

SATURDAY EVENUE, March 10, 1985.
In histiness circles there has been quite a carm
to-day. The wires being still down the news from
the east was of such a meagre character as to render it almost impossible to transact basiness with the east was of such a meagre character as to render it atmost impossible to transact business with any degree of selety, and asil by common consent both buyers and sellers held off. Only three dispatches sware received from New Nortz, via Montreal, the first quoting golu at 1644, the second at 1654, and the third, date noom, 1641. These quotations indicated a steader feeling, but is the absence of details there was not much disposition to operate for an advance, and short sellers were more cautions than they have been for some time past.

The money morked continues very stringent but the rate of discount is unchanged; viz, 10 per cent per amount. On the street, however, rates are from at \$65 per cent per month. The supply of currency is fart, but owing to the uncertainty of prices, the discount houses are generally refaining to make advances, except to their besi castomers, and on unexceptionable securities and wide margins.

The supply of Eastern exchange it very light-

AMUSEMENTS.

rising. All land communication is cut off from here.

Franklin, March IT—6 n.M.—Thee river has risen since last hight fourteen feet. Most of the bridges are swept sway, and we have no communication with any piace by rail. The whole of the lower part of Oil City is swept away. Houses, with their immates, are floating on the river. It is impossible to estimate the loss and distress. The river is filled with averything perializing to the oil trade. The railroad to Meadwille cannot be repaired for a veral days. The Oil City Railroad is under water. The damage is great. The oldest inhabitant says the river is higher than ever known before.

Lazas—The river cased rusing at 8 o'clock p. m. Neyvennu's. The last week of the energe-ment of the Plorences, at McVickor's Theeter, was brought to aclose on Saurday. The week was filled in with a variety of Irish places, walch draw well in face of the weather, and the fact that on Satarday were "Hery O'More," and the "YanRes Housekeeper."

ANOTHER DISPATCH.

FRANKLIN, March 17.

This is the greatest freshet ever known in Oldern. There is complete destruction of everything. The Oil City Railroad is two feet under water. The bridge over French.

LOCAL MATTERS. Quite n Large Amount of the stock to Tar Spring Potrollenn Company, apportune or Chicago, has already been substituted for. Those who desire to scenre shared unit-biged to call during the present week. Offi

THE GREAT PRESHET OIL CITY SUBMERGED. Everything Pertaining to Oil Afloat.

liouses with lumates Floating in the Stream,

came cause.

Concerning the destruction by the freshet clowders we have the subjoined dispatches: FRANKLIN, March 12.—The river is six feet higher at this place than ever known before. The bidge across French creek has been evert off. The lots is estimated at over \$1,00,000 in this section. The water is still rising. All land communication is cut off from here.

FRANKLIN, March 12.—In a The description of the control of th

FROM CINCIANATO

had was the date? In the state of the state, I was released, and on the sext day to your officers will be specified that and for manufacts proporting that all that we do not not that you will be set on your control of the sext day to the

a Court for turn to the record of an extensive, and added in an under tone, "I will aimed to your case."

Mr. Asey took notice of the remark, and made sheeless to it as minimizing the witness. The Judge Advocate rend the record to the witness, and saked him if he the not so testity. The fitness was undesversary to capitally, when the note witness was undesversary to capitally, when the note witness that the sake and the saked him to the saked him the saked him to the saked him the shore, who summated them to greater exertion by frequent demonstrations of approval.

The loss immediately around the city is confined principally to oil barrela a large number of which were floated off. Workmen were engaged to a late hour last night in removing barrels from the wharf, and it required the atmost exertion, in many instances, to save them, owing to the rapid rise of the river. It is impossible to estimate the damage which has been sustained, but it will be very heavy. Mr. Strickler, and oil dealer, lost 360 barrels, and the Lucasoo Oil Works are also deavy locers. We did not learn the nums of ray officer.

The lines of the various rall loads centering in this city suffered severely from the flood. At Tipton, beyond altoons, on the Fennsylvania Raitrond, a bridge ower a small stream was washed away and delayed the tenine for some hours. The damage, however, was rapaired, and the trains commenced running assumb. The track of the Allegheny Valley sinding was submogred between Presport and Kintaming, and travel was suspended. We learn that the tree along the line of this road was swollen to such an extent, in some places, as to cover an extant of four or five niles. The Pitteburgh, Fort Wayne and Chicage Railroad was not hocommoded by the high water, and their trains were run as usual. The telegraph wires along the Ohio river were glavus last night, caused by the poles supporting them being washed away by the flood. The wires dest also sufficed from the same cause.

TRETTHONY OF FACOR MULL.

I reside in Shelby county, Ky, and am a b to George W. Hull, who astified before the muselon. I and my brother were in the County and service, but have since taken the dath of Senous-RAMBEATOR.

No other person was present with us when me we have been been also the formation. We nother a practicing law in Louisvelle and supports almost lie has never had any gardinn on account obeing master, and has never been in an innual sapium. He statement was that he was going; tell here what he knew about Grenfel, and wond average himself in that was.

To Mr. kmy — My brother's physician constitution of the courter but data imbeedility of mind extended to the courter but data imbeedility of mind extended.
